Abramovici, M., 5

Balsiger, P., 297

Crato, N., 67

Dechter, R., 225
de Klerk, E., 37
de Sousa, J. T., 5

Gent, I. P., 1
Gomes, C. P., 67
Groote, J. F., 101

Heuerding, A., 297
Hirsch, E. A., 127, 397
Hoos, H. H., 421

Kautz, H., 67
Küchlin, W., 145

Marraro, L., 165
Massacci, F., 165, 319
Mills, P., 205

Padmanabhan, R., 365
Penner, P., 365

Richards, B., 483
Richards, E. T., 483
Rish, I., 225

Schwendimann, S., 297
Selman, B., 67
Sinz, C., 145
Stickel, M., 277
Stützle, T., 421
Sutcliffe, G., 371

Tsang, E., 205

van Maaren, H., 37

Walsh, T., 1
Warners, J. P., 37, 101

Zhang, H., 277

Subject Index to Volume 24

automated theorem proving, 371

backtracking, 67
backtracking search, 225
benchmark, 297

cipher verification, 165
competition, 371
completeness, 483
complexity, 319
computational complexity, 225
confluence, 319
constraint satisfaction, 67

Data Encryption Standard, 165
Davis–Putnam method, 277
decision procedures, 319
direct and translation methods, 319

empirical evaluation, 421
empirical studies, 225, 483

formal specification, 145
formula, 297

greedy local search, 127

heavy tails, 67
hyperbase, 365
hyperidentity, 365

industrial application, 145

knowledge compilation, 225

lattice, 365
local search, 205
logic, 297
logical cryptanalysis, 165
lwb, 297

massive parallelism, 5
meta-heuristics, 205
modal, 297
modal logics, 319

nonsystematic search, 483

optimization, 205
Otter, 365

prefixed tableaux, 319
product data management, 145
product configuration, 145
propositional, 297
propositional logic, 101
propositional satisfiability, 165, 225, 277

quantified boolean formulae, 165
quasilattice, 365

reconfigurable logic, 5
relaxation, 37
resolution, 225
robustness, 421
run-time distributions, 421

SAT, 127, 397, 421
3-SAT, 483
SAT benchmarks, 165
SAT problem, 205
satisfiability, 5, 67, 101

satisfiability problem, 37
semidefinite programming, 37
stochastic search, 421

theorem proving, 101
trie data structure, 277

verification, 145
virtual logic, 5

workbench, 297
worst-case time bounds, 127
worst-case upper bounds, 397
